

A fully integrated supply chain management system

From sourcing products and materials across Australia into our Brisbane operational and logistics hub; to packaging and bulk shipments up into Papua New Guinea through our Lae dockside container terminus and distribution centre - the distinctive blue livery of our extensive fleet of bulk fuel and dry goods trucks are a daily sight across the region.

So whether it's the transportation of millions of litres of diesel fuel across the rugged central Highlands Highway, delivering dry goods and machine parts across PNG's coastal plains; or preparing and serving high quality meals to isolated mine sites - you'll find iPi playing a key partnering role in the success of a diverse and ever-expanding range of businesses.

At iPi - we deliver.
